Science, Technology, Engineering, Math**

Our Mission and Vision

Vision Statement

It is our vision at Brigham Academy to develop each child to his or her fullest potential through both academic and personal achievement. We stress individual responsibility and citizenship to develop tomorrow's leaders in an ever-changing global society through the promotion of Science, Technology, Engineering and Math (STEM).

Mission Statement

The mission of Brigham Academy is to ensure rigorous, relevant learning experiences that result in high achievement for all students. Students will excel in all areas of academic learning by utilizing cooperative teaching strategies and a project-based learning approach while focusing on high expectations and critical thinking skills.

Our Curriculum

Our curriculum prepares students for successful academic and personal achievement by stressing individual responsibility, citizenship and leadership. Educational opportunities include:

- Traditional, rigorous academic curriculum
- STEM Labs (Science, Technology, Engineering and Math)
 - Science Lab – This lab promotes hands-on investigations to introduce students to scientific inquiry, the process of asking questions and conducting experiments as a way to understand our natural world.
 - Technology Lab – A digital learning experience promoting graphic design, movie making, voice narration and story boarding.
 - Engineering Lab – An innovative classroom where children work in collaborative teams engaged in the engineering process: ask, imagine, plan, create and improve.
 - Math Lab – Students will be challenged with a collaborative task utilizing manipulative and problem-solving strategies to help them better understand and interpret our mathematical world.
- Leadership development
- Computer labs
- Visual / Performing Arts

Students who complete fifth grade will attend Jewett Academy for middle school.

Extra-Curricular Activities

Brigham Academy offers opportunities for our students to participate in activities that go beyond learning in the classroom. Students may participate in the chess club, chorus program, strings, Economics Team, robotics and Bricks4kidz. Intermediate students are offered the opportunity to participate in television production.
