

TAKE FULL ADVANTAGE OF EACH MOMENT

Dundee Elementary Academy provides an innovative learning experience that develops confident and independent students. Foreign language offerings for all, multi-cultural projects, and digital connections to classrooms worldwide, ensure that our learners are prepared as internationally minded, global citizens.

WE HAVE A PLACE FOR YOU

Learners at Dundee Elementary Academy develop their passions and interests through project-based learning and the utilization of cutting edge technologies.

Our students are immersed in hands-on learning around engineering and design, performance, programming, and field experiences with local farms. STEM pathways cultivate productive global citizens and innovators.

The Dundee Elementary Academy community nurtures the whole child and fosters inquiry, which enables our students to experience other cultures, explore and test new concepts, as well as develop a mindset which will establish them as leaders in the 21st Century.

Dundee Elementary Academy prepares learners to excel in their chosen field through the integration of Science, Technology, Engineering, and Mathematics (STEM) concepts across all core subject areas.
