Learners at Jewett School of the Arts have access to a wide range of activities that foster innovative thought and expression. Our learners connect to and enhance their world through a variety of design media, theatre, musical expression, and dance.

We create environments where our students can discover, collaborate, and experiment. STEAM pathways enable learners to approach their work from diverse perspectives that lead to innovative thought, creative confidence, and core skill development. This approach positions our students to be leaders in tomorrow's STEAM related fields.

Designing flexible solutions for tomorrow through creativity today.

*To develop a complete mind:
Study the science of art;
Study the art of science.
Learn how to see.
Realize that everything connects to everything else.
- Leonardo Da Vinci*
